CREATING SOLUTIONS, DELIVERING EXCELLENCE

Formerly Aquatic Pools Services, which began operations in 1987 as a builder of commercial water features and water treatment systems, Waterlink Technologies Sdn Bhd came into existence in 1998. Ever since, we have been engineering and delivering world-class solutions for water facilities across the board in an innovative, cost-effective and reliable manner.

The company was founded by Dato' Charles Tay, an industry pioneer with a wealth of expertise and decades of experience in the design, consultancy, construction and maintenance of water features, swimming pools, life support systems (LSS), theme parks, water parks and water treatment systems.

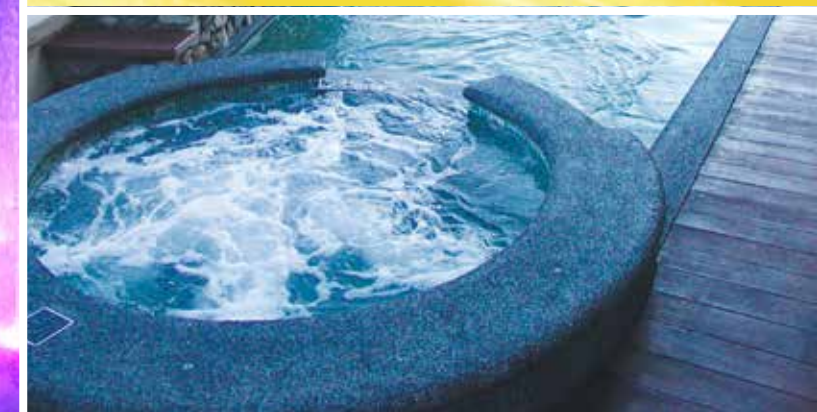

Under his leadership, Waterlink has acquired proven and tested technologies, developed a fully integrated operation and built a committed and capable team to take on a wide range of projects, from the functional and operational to the artistic and aesthetic.

Today, we offer comprehensive services covering design, construction, maintenance and consultancy for aquatic facilities, oceanariums, water features, bio lakes, life support systems (LSS), filtration systems, swimming pools and water theme parks, which have a positive impact on people's daily lives and wellbeing.

Our solutions answer diversified needs of the private, commercial, industrial and institutional sectors. Over the years, we have proven our capability in successful completion of projects that present challenges in terms of time, scale and technicality.

Among the projects we have completed are "Busan Underwater World (Korea)", "Cheng Feng Aquarium (Shanghai, China)", "Aqua Beat (Langkawi)", "Langkawi Under Water World Phase#2 (Langkawi)", "Guian Theme Park (Fuzhou, China)", "Legoland Theme Park (Johor Bahru)", "Legoland Waterpark (Johor Bahru)", "Flintstone Beach House (Mersing, Johor)" and "Desaru Coast Adventure Waterpark (Johor)".

Our highly acclaimed technical expertise also enables us to secure industrial water treatment projects from both local and foreign long-established industries, such as "Submarine Escape Training Tank (SETT) in Kota Kinabalu, Sabah" and "Pinewood Iskandar Malaysia Studios Filming Tank in Nusajaya, Johor".

PROMOTING WELLBEING, ENHANCING LIFE

Water is a vital source of life, and a precious resource in today's world.

At Waterlink Technologies Sdn Bhd, we take pride in unlocking the potential of water in ways as inspiring as they are efficient and sustainable. It is about putting technologies, expertise and equipment together in smart and practical solutions that enhance the quality of our daily lives.

Be it through recreational facilities, relaxing environment, a conducive educational platform or resource regeneration and management, we create ideas, knowledge and technologies working towards our vision in promoting human wellbeing, and in turn, building a better world.

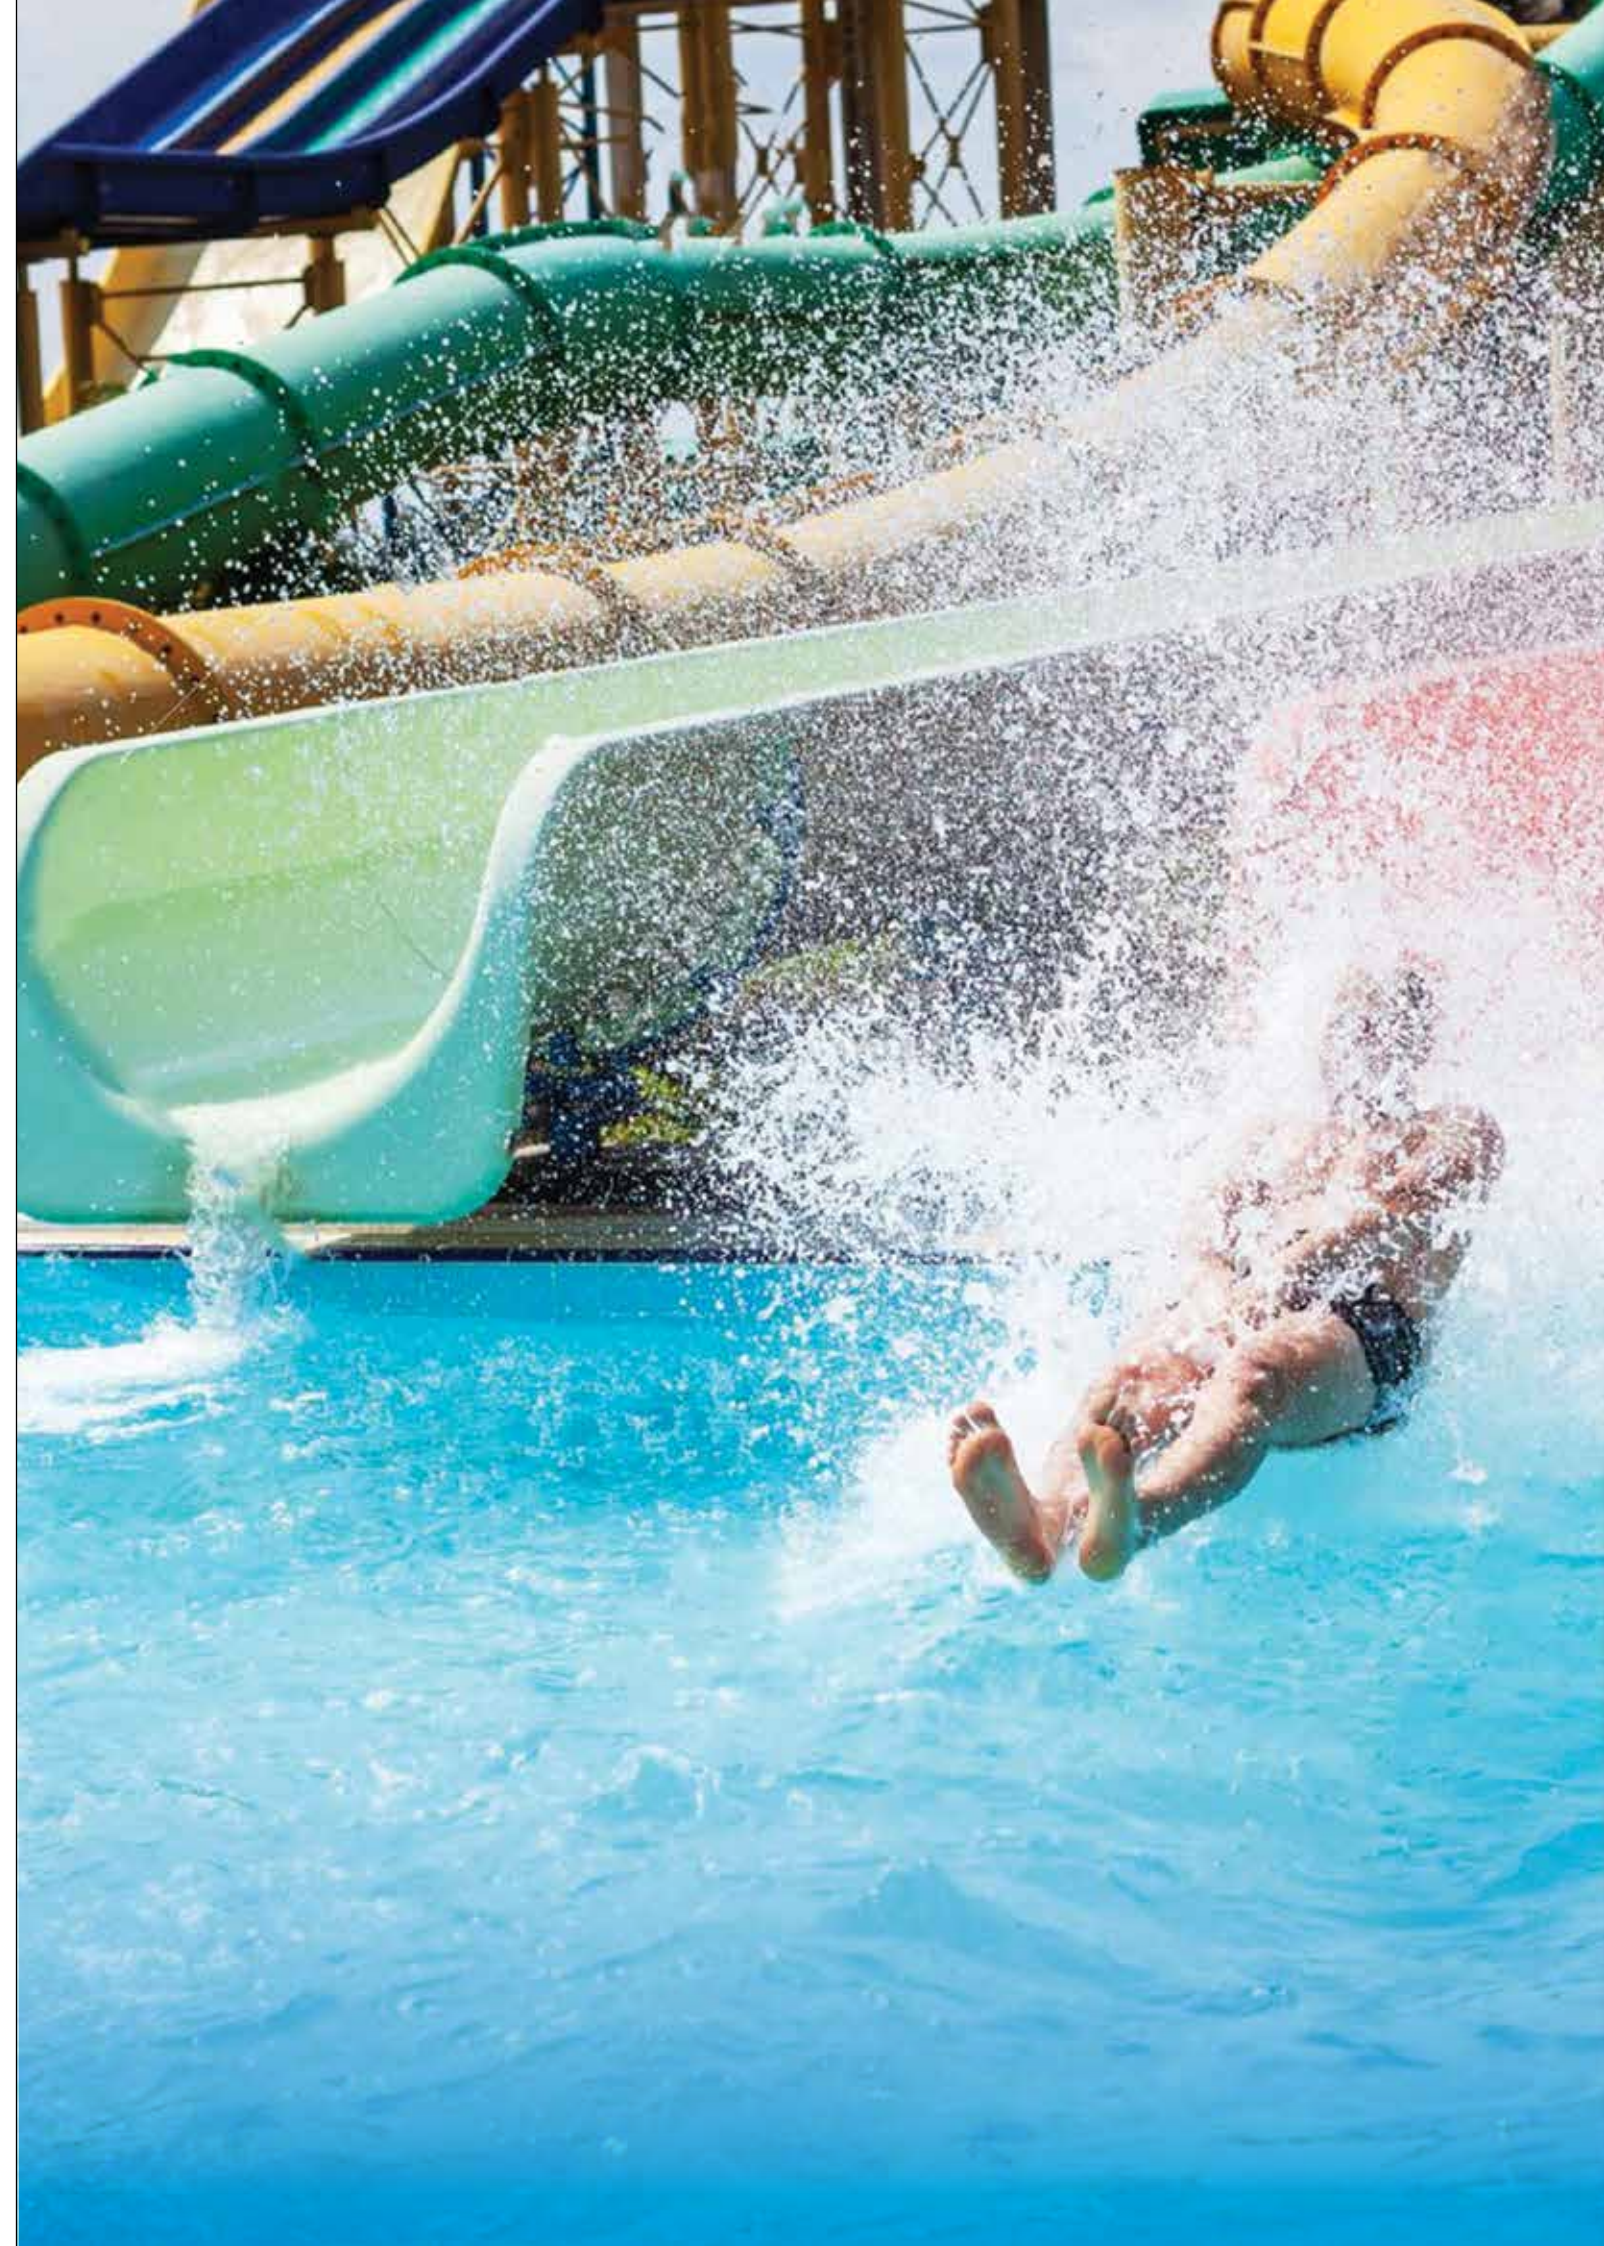

Technological innovations in engineering, computer software, material science and manufacturing have enabled us to come up with revolutionary concepts, and new ways in realising them. We are committed to meeting challenges posed by complex technical issues, fast-changing customers' demands, and evolving needs of our time.

We are indeed honoured by the confidence and trust placed in us -- a driving force that makes us work even harder to keep ahead of the trends and solutions that can bring exceptional value to our customers.

This commitment of ours will not be met without the staunch support of our business partners, who have chosen us as their most trusted authorised dealers and installers of world-class and state-of-the-art equipment, products and systems.

Moving forward, we will continue to make efforts guided by a firm belief in creating the best possible impact with water for the celebration of life.

Dato' Charles Tay
Managing Director

Forging Alliance, Generating Synergy

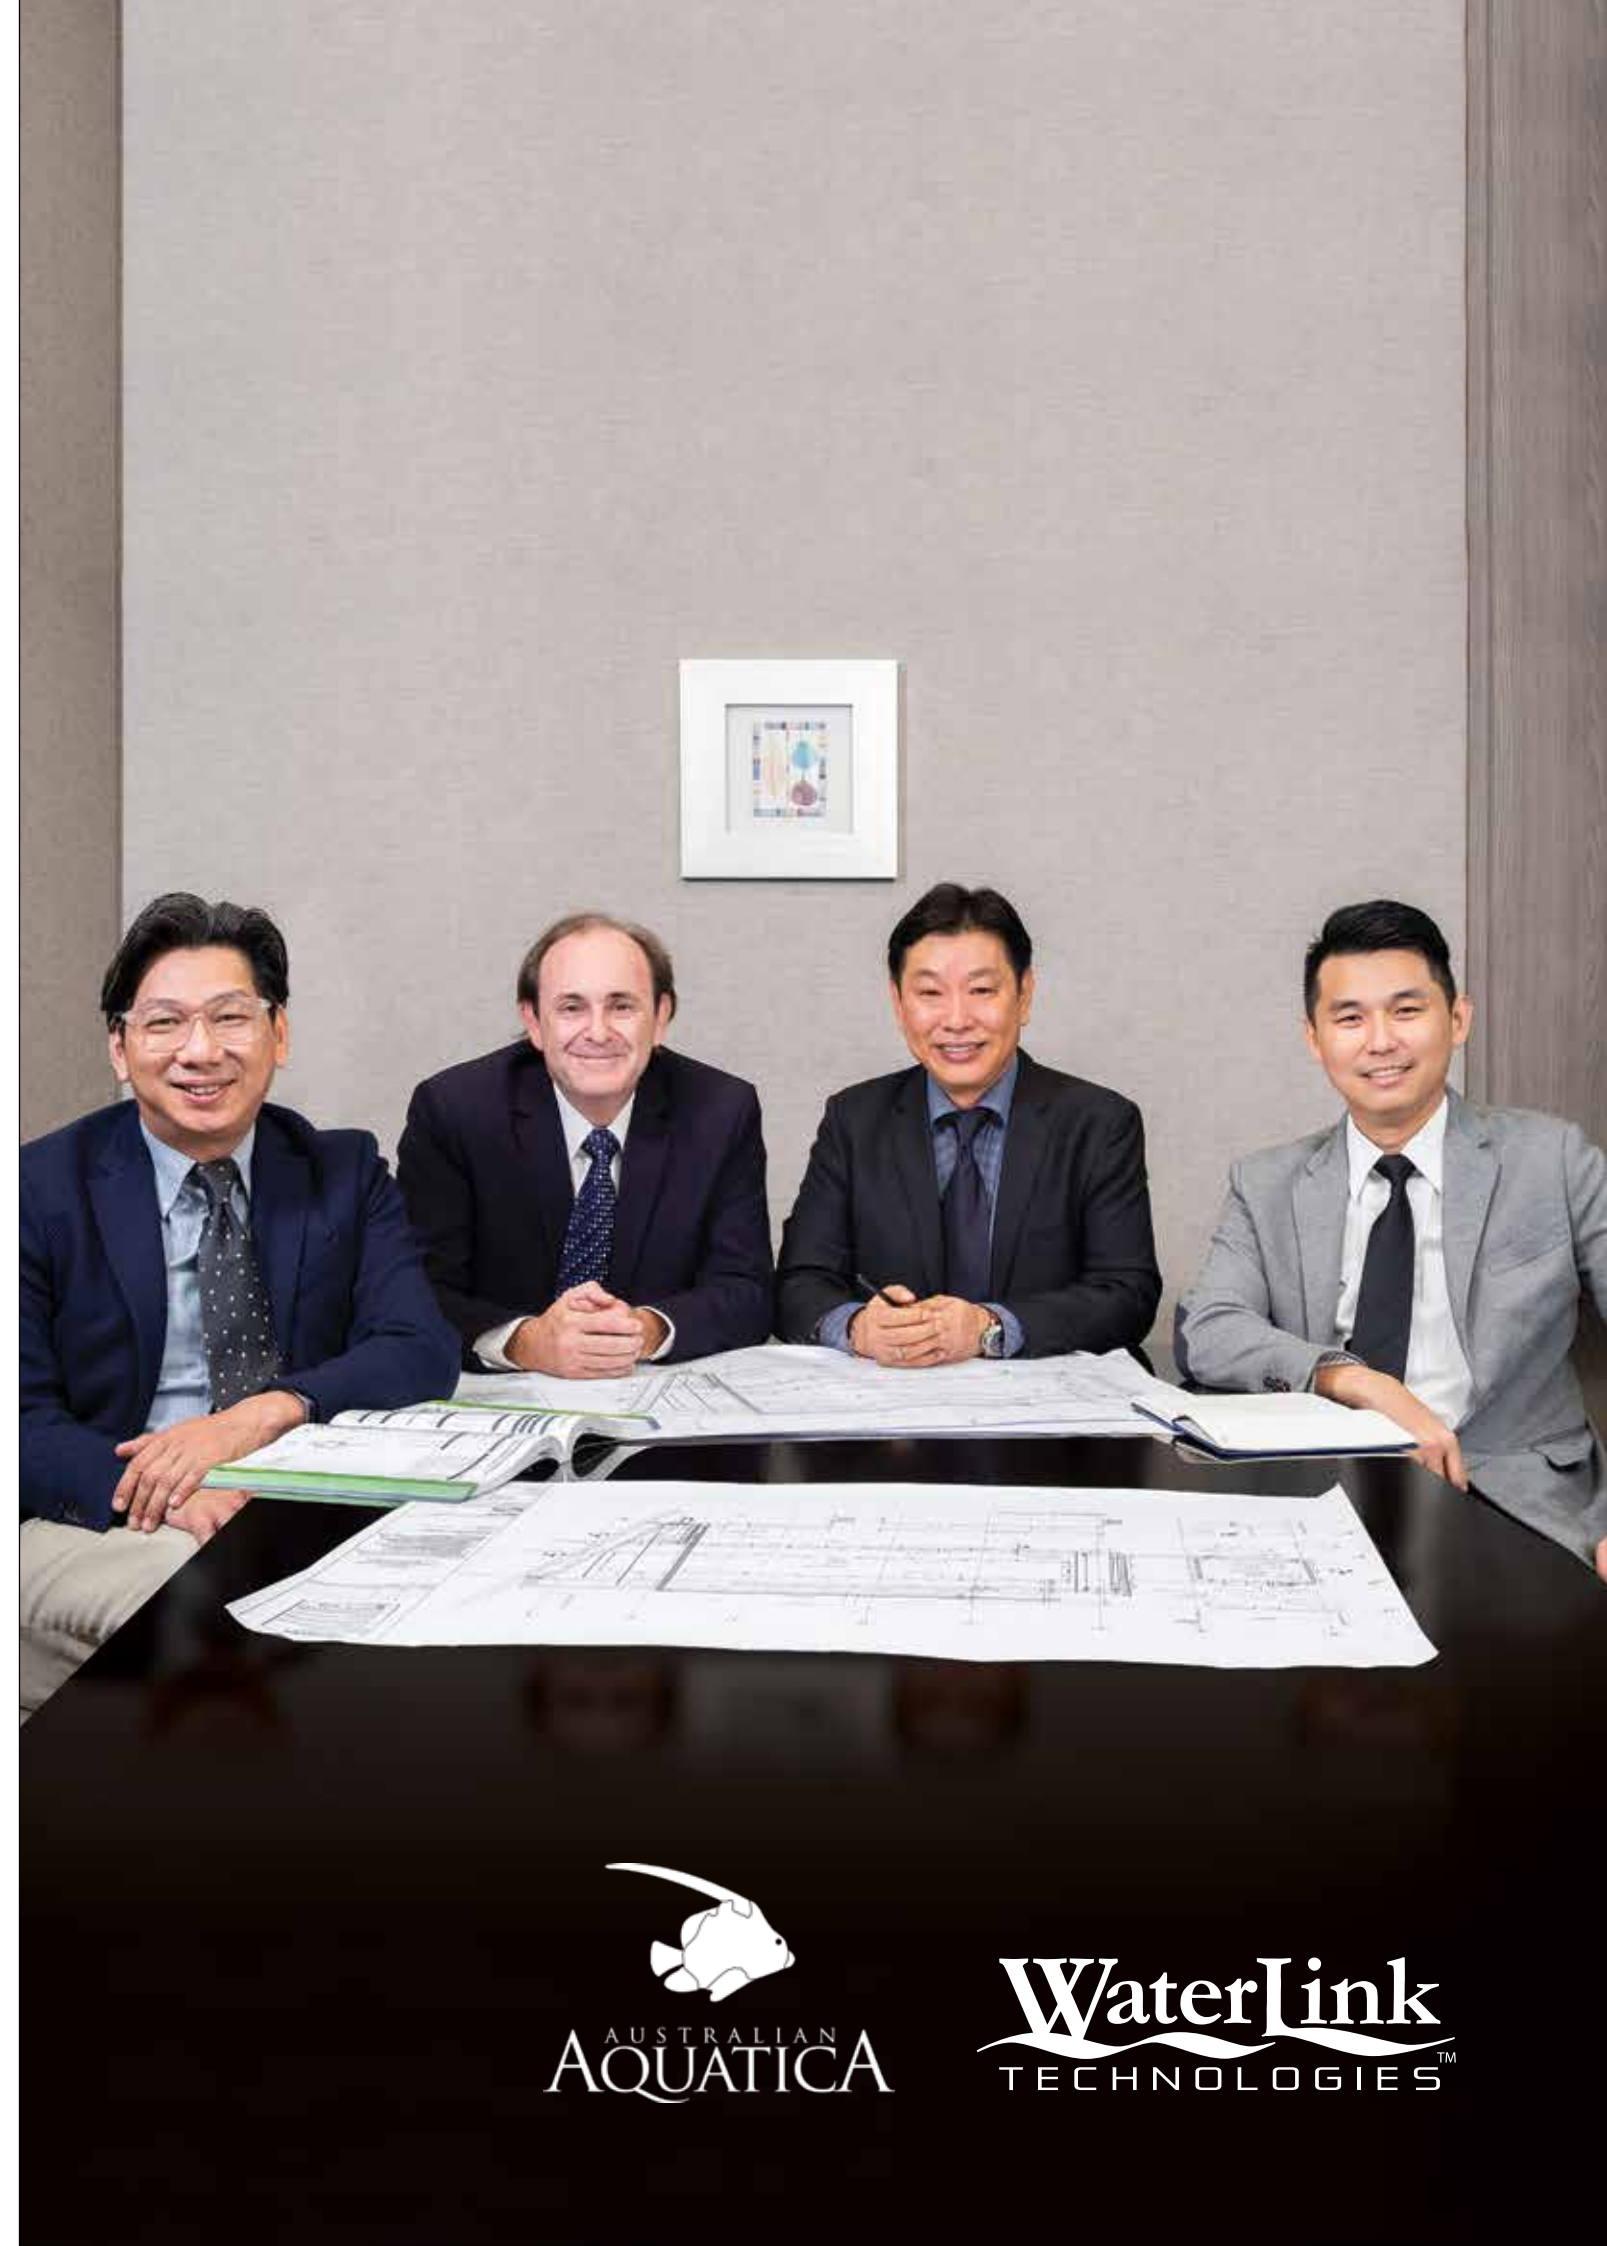

Waterlink Technologies Sdn Bhd reckons that as the Company's business grows, one way to forge ahead and stay at the forefront is to build strategic partnership with companies that not only complement what Waterlink Technologies does, but also share the Company's vision and passion.

One such business ally of Waterlink Technologies Sdn Bhd is Australian Aquatica, an Australia-based company specialising in the design, building and maintenance of aquariums and other aquatic facilities. Commissioned by clients from all over the world, Australian Aquatica is synonymous with innovative concepts, efficient construction, superb cost-saving, professional management and on-time delivery. These business attributes certainly match up to Waterlink Technologies' own.

Australian Aquatica is an invaluable source of expertise, which complements that of Waterlink Technologies. The Australian company's diverse pool of professionals has a combined experience of more than 80 years in producing and managing aquatic facilities. Its extensive track record of international projects, past and current, shows that the company has managed to adapt ideas that bridge cultural and age gaps, creating and constructing unique, impressive, educational, enjoyable, living, animatronic, audio-visual, interactive and diorama-styled exhibitory encapsulated in beautifully-designed, all-weather, environmentally friendly and safe aquatic facilities.

Australian Aquatica works closely with the architects to develop individual facilities, tailor-made to suit existing buildings or brand new projects. Its complete range of services covers all aspects of production, be it conceptualization or turnkey completion with on-going facility management and operations. Teaming up with Australian Aquatica, Waterlink Technologies Sdn Bhd is able to expand possibilities for our clients.

Fast recognised as a world leader in the field of aquatic facilities, Australian Aquatica has a long-term working relationship with Waterlink Technologies Sdn Bhd for project collaboration.

CLEAR GOAL, SHARP FOCUS

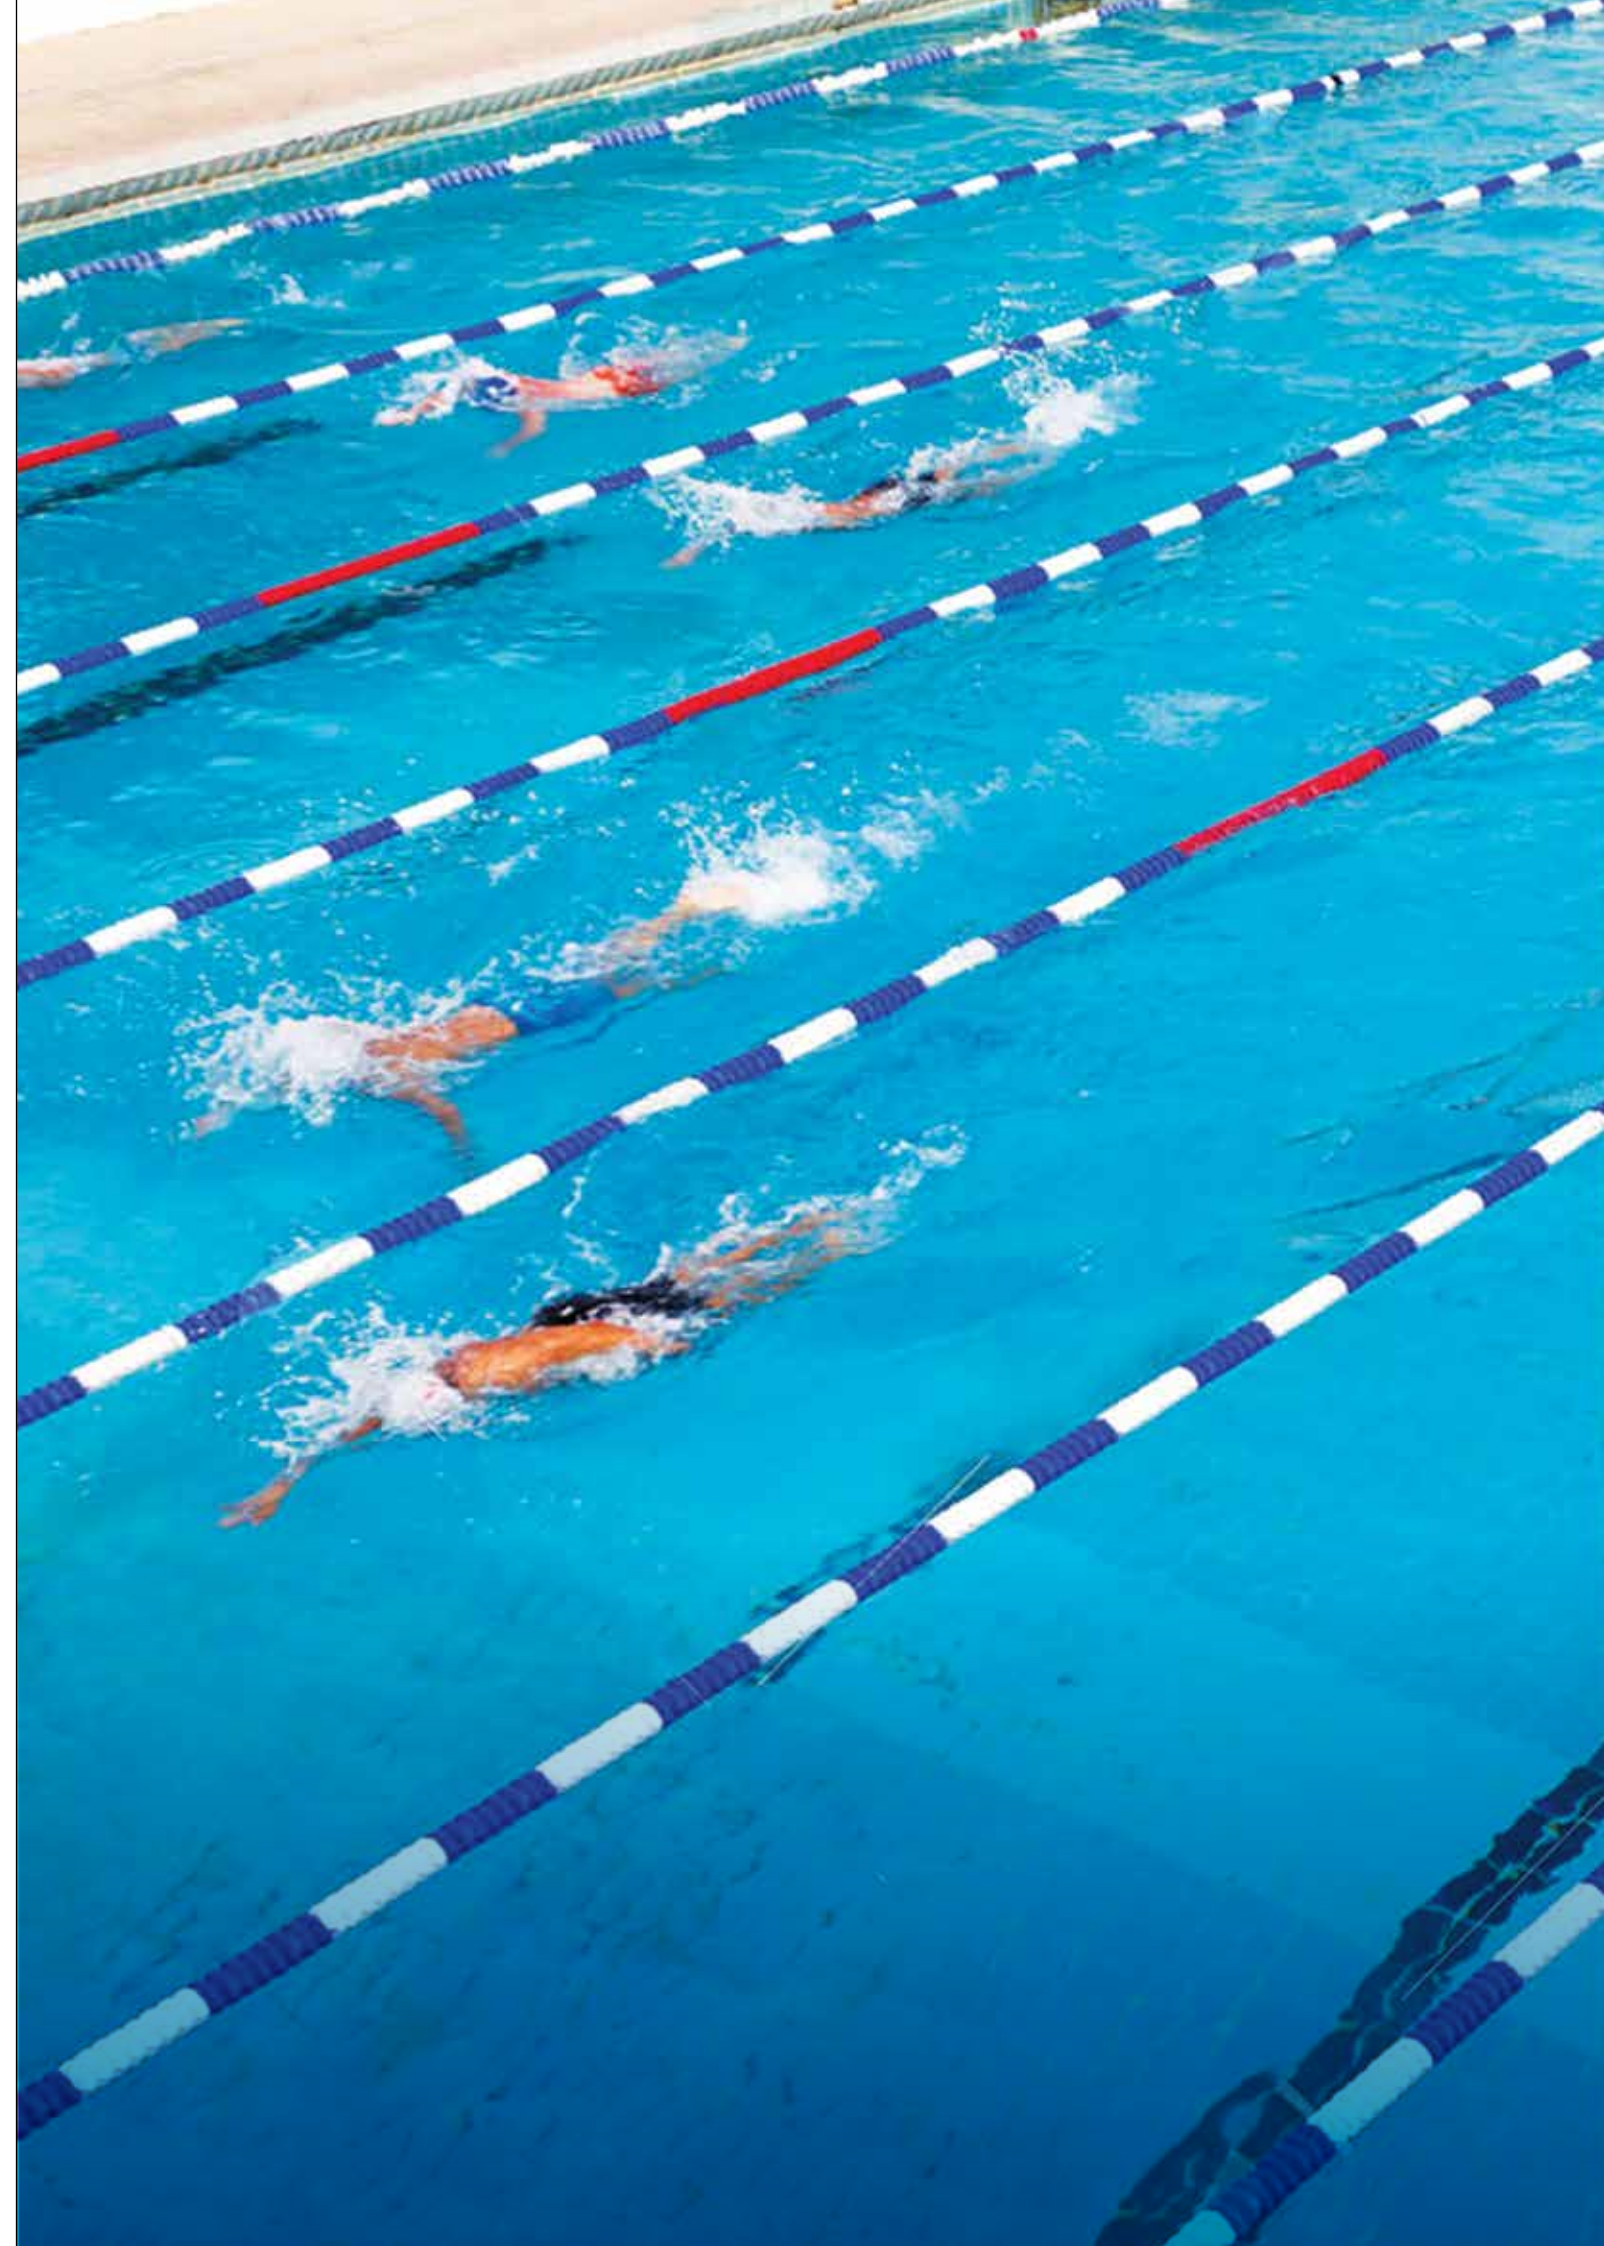

Vision

We aspire to perfect the ways in which recreation, relaxation and rejuvenation is achieved for human well being, now and into the future.

Mission

We are committed to developing intelligent and sustainable solutions for water facilities to enhance the quality of our daily lives.

GROWTH IN BREADTH, GROWTH IN DEPTH

Experience

Customer endorsements not only open up our business opportunities but also help build our exposure and experience. Our portfolio of completed projects to date covers local and overseas water facilities of impressively varied scale, technicality, budget and project time-line -- from public establishments patronized by hundreds and thousands of international visitors to private creation enjoyed by an exclusive few.

Team

We put together the best possible project teams for our customers. Our managers and engineers, many of whom are certified by relevant professional organisations, are experts in their respective fields. They supervise trained technicians and skilled craftsmen who benefit from guidance and motivation in performing their duties, meeting challenges, and delivering quality results.

Recognition

Besides being a respected member of industry-related associations, we have established close working relationship with distinguished brands of world-class and state-of-the-art water equipment, products and systems, making us their preferred business partner, authorised dealer and approved installer. This has given us access to front-line support and technical assistance highly appreciated by our customers.

Consultancy

By way of consultancy that involves listening, understanding and analysing of our customers' requirements, we are in a strong position to achieve those with the right steps, from concept to completion. As a proactive consultant, we focus on providing the best advice and recommendation during the entire process. Thanks to this commitment, delivery of desired customer results has become a cornerstone of our strength.

SEAMLESS PROCESS, COMPREHENSIVE SERVICE

Design

Keeping abreast of emerging global trends and technology in water facilities, our team of qualified personnel devises master plans characterised by design excellence that come hand in hand with the fulfilment of customer aspiration.

Construction

We undertake the entire construction and installation process. Guided by sound technical principles, our project teams work efficiently to match resources, equipment and expertise within the parameters of agreed time frame and budget.

Maintenance

Being service-oriented, we are committed to maintaining the facilities in optimum working condition after handing them over. Our maintenance teams respond fast to customers' requests of inspection and parts replacement, and provide timely advice.

AUTHORISED DEALERSHIP

Our major products in Malaysia include filtration equipment and accessories for aquascapes, commercial water features, swimming pool and spa water features. Other than our own brand of equipment and accessories under the Waterlink name, we carry other major brands such as Pentair, Speck Pumpen, AIS, Astral and Aquacal. We also export our products to many countries, mainly to Australia, Cambodia, Thailand, China, Indonesia and the Maldives.

PENTAIR (USA)

Pentair is a leading provider of water solutions addressing the world's water scarcity issues and delivering quality water to homes, businesses and communities. With the broadest offering of water pumps, filters, systems and solutions, Pentair helps each step of the water process. Whether it is water from the ground, ocean, lake or rainwater collection, Pentair has products and systems to ensure that water is moved and treated to where we need it most.

Pentair Aquatic Eco-Systems (USA)

Pentair Aquatic Eco-Systems, Inc., offers unmatched selection, service and solutions to the aquatic community. With increased product breadth-including diffusers, water quality monitors and controllers.

AIS – AUTO CHLOR (AUSTRALIA)

Australia's Largest Manufacturer of Salt Chlorinators. Auto Chlor is a high performance salt chlorination system that lets you enjoy crystal clear pool water without the harsh chemicals. It is safe, clean, easy alternative to dosing your pool with dangerous, expensive and messy chlorine granules, tablets or liquid. Auto Chlor improves your pool water quality by using harmless salt.

ASTEL

The company ASTEL d.o.o. was established in 1991 and has been one of the leading European manufacturers of video surveillance equipment for over a decade. Experiences in the field of security and GSM alarm systems led to the development and production of electronic marine equipment that provides a high level of safety and dependability of operation. The ASTEL LIGHTING brand name was launched in 2009 as the result of very well accepted marine lighting products fitted in luxury yachts.

TYLOHELO

TylöHelo – a Nordic sauna company, world's leading manufacturer of high quality bespoke sauna rooms, sauna accessories, steam rooms and Infrared technology. With 170 years of accumulated knowledge, TylöHelo continue creating top quality sauna products made to be a vital part of healthy living.

EVOQUA

Evoqua water technologies has been synonymous with water disinfection since 1913, and filtration since 1956. Featuring award winning equipment such as Wallace & Tiernan® dosing and instrumentation, Neptune-Benson's Defender® Filtration, ATG™ UV Wafer system and Pacific Ozone™ system. Safe solutions for plant rooms include the OSEC® L electrochlorination system, the Gas Monitoring System (GMS plus) system, and the Ezetrol® and Depolox® range of dosing control systems to reduce the need for chemical handling.

Myrtha Pools

Myrtha Pools was developed in 1961, by Mr. Giorgio Colletto. It was the first Italian company to use prefabricated swimming pools. Through research and development, Myrtha Pools has become leaders in the swimming pool industry and have created an international brand renowned in the competition, leisure as well as the hospitality industry. Throughout its 60 year history, Myrtha Pools has taken large number of challenges, and has been successful, all made possible with its patented hot rolled stainless steel modular panels which are PVC laminated.

CUSTOMERS FIRST, PERFORMANCE DRIVEN

- We will continue to invest in systems, equipment, people and time in order to realise new ideas, answer changing needs and keeping abreast of emerging trends.
- We will continue to provide industry-leading technical expertise, and expand the breadth and depth of our services.
- We will ensure customer's satisfaction by working closely with our customers to provide quality consultancy and proposals.
